EcoStruxure™
Innovation At Every Level

Customizable User Interface for Technical Applications

SmartX Advanced Display (AD)

Gain more control, convenience and comfort in buildings with the SmartX Advanced Display (AD). Specifically designed to work with EcoStruxure Building Operation, SmartX AD easily locks to the WebStation application to create a dedicated tool for local operation and maintenance of an EcoStruxure BMS. Facility and building management staff can thereby monitor and manage their buildings without having to access a PC.

Greater efficiencies with a robust operator interface

SmartX AD is an industrial grade HMI, exhibiting a 10" display. As a permanent-mount device it is dust and moisture resistant, and combined with an enclosure rating that supports IP54, it is ideal for local maintenance when installed on control panels or walls in mechanical rooms.

Benefits of the SmartX AD

- Convenience:
  - Turnkey, maintenance-free solution
  - Extends building control to a larger number of technical staff
- Simplicity:
  - Functions accessed by WebStation
  - No need for user training
  - Intuitive touch screen navigation
- Versatility
  - Supports both wired and wireless communications
  - Customizable to a wide range of roles
  - Dedicated and secure for peace of mind

Life Is On | Schneider Electric

SmartX Advanced Display (AD)

Peace of mind

The password-protected “Kiosk” mode makes the SmartX AD a dedicated user interface, limiting operational functions to only those determined by the building or facility manager. This opens up use of the tablet to more technicians, while providing technical personnel with peace of mind knowing other systems are secure. There is no way for users to change the default settings, therefore minimizing maintenance and reducing the risk of device theft.

Optional wireless

A Wi-Fi module is offered as an optional add-on to SmartX AD for projects that call for wireless communications. Not having Wi-Fi built-in ensures an extra layer of security for environments that restrict wireless communication.

For more information, please contact your Schneider Electric representative.

SmartX AD Features

- Crystal clear high resolution touch screen display for the best view of BMS graphics
- Robust software locking mechanism (kiosk mode) secures functionality and deters theft
- A mountable product that is fast and easy to install in a matter of minutes

Commercial Office Buildings			
Benefits	• Obtain access, control systems • Solve problems from anywhere • Save time and personnel resources	• Allow access to building system to a wide range of personnel for immediate action	• Differentiate and increase property worth • Improve investment and resale value • Retain tenants
User Functionality	• Facility Managers control room temperature, lighting, space management, etc.	• Technicians control room temp, lighting, trouble shoot operational issues, etc.	• General Contractors and Property Managers incorporate unique value-added services
Unique Features	• Kiosk mode dedicated for building maintenance	• Panel mount (in electrical cabinet) USB wired, no WiFi required	• Wall mount Constant access to BMS information
